

COMP 1105 WT 75% Assignment - Lesson 10

[Submit Assignment](#)

Due Monday by 11:30 **Points** 75 **Submitting** a website url or a file upload

Available 2 Jun at 0:00 - 7 Jul at 18:30 about 1 month

ASSIGNMENT –WEB TECHNOLOGIES COMP 1105 (LESSON 10 SUBMISSION)

LEARNING OUTCOMES COVERED IN THIS ASSESSMENT:

- Identify solutions to complex problems.
 - Design and implement a business-oriented web site.
 - Evaluate, document, and present a multimedia website.
 - Demonstrate evidence of reflection on academic performance by implementing feedback given.
 - use appropriate technology to simplify studies e.g., use of information
- resources, production of individual assignment, communication with tutors and peers.

ASSIGNMENT INSTRUCTIONS:

1. You may discuss the assignment to understand the problems and the various learning topics. However, you are not allowed to share solutions to the given assignment task or your solutions with any other classmates.
2. **Citing your sources:** If you have reused any packages, tools or techniques, and any other resources you must provide the reference list in your assignment submission document. You do not have to cite module lecture notes, slides, module textbook, or other lab task exercises.

SUBMISSION REQUIREMENT

Please note that learners must submit all assignment by the stated due date (s). Your solutions to the assignment will be submitted as a zip file with all web pages, images, scripts and css files.

File name: *StudentNo-FullName- WT-assessment.zip*

1. Submit your completed report to the Canvas LMS under the folder titled "WT Assignment – Submission Folder" by

Submission Date: last lesson -**LESSON 10**

Submission Time: on or before **11.30AM**

Late Submission maximum 3 days from the submission due date: A deduction of 5% from your actual mark shall be imposed on each day. Assignment submitted after 3 days from the due date is marked as a fail grade. No assignment will be accepted for marking after this date.

2. Backup

- All assignments submitted will not be returned to learners.
- Please ensure that backup copies are kept on different devices.
- Learners are responsible for their own work and must perform the necessary backups.

WEB TECHNOLOGIES ASSIGNMENT - Individual Work

Please read the entire assignment brief to ensure you understand all the requirements before you begin.

1. INDIVIDUAL ASSIGNMENT

This assessment should be attempted individually and independently. Individual assignment work can facilitate your learning, improve thinking skills, practical skills and prepare you to work independently while collaborating in groups across borders spread across the globe in your future careers.

The marking criterion for the Coursework is based on the assessment marking scheme in **ANNEX A** and assessment rubric included in the last page of this assessment brief in **ANNEX B**.

1. PROJECT SPECIFICATION

Introduction

The key objective of this assignment is to assess the students' ability to understand and utilize the technologies used in web design / development. Implementing the Web site which includes the construction of a graphically interesting and user-friendly Web site using HTML5, CSS and JavaScript etc.

TASK LIST

This assignment consists of **ONE (1)** task.

TASK 1 Web Design and Implementation

(75 marks)

The Client

The Singapore Zoo and Jurong Bird Park have merged under the Singapore Wildlife foundation and have decided to create a new website to announce their formation and the new features that they will be provided to visitors. The site should serve as an information point for both local and foreign patrons to learn more about the Attraction.

You are tasked to design a website with 5 pages. For example, these pages can include the

1. Home Page
2. About Singapore Wildlife Foundation Page
3. Animals of Singapore Wildlife Introduction Page
4. Contact Us Page
5. Feedback Form Page

You will be marked based on the design and usability of the website.

You will create HTML pages that includes all the content in a proper arrangement in preparation for creating a CSS layout. The page should be placed in your web design folder and named index.html. You should include:

1. Title on page and in Title Bar
2. Images
3. Your name and Student ID and Email
4. A Navigation Scheme: you should use “#” in place of the not-yet-completed links.
5. Basic links to social media.
6. Other background information.
7. Styling should be formatted using an external CSS file.
8. Javascript should be done using an external JS file.
9. You should also comment the code with at least four comments.
0. The site should validate: [https://html5.validator.nu/\(Links to an external site.\)](https://html5.validator.nu/(Links to an external site.)) [\(https://html5.validator.nu/\)](https://html5.validator.nu/)

Students will create a responsive web page.

- The page will include a text (and possibly image) based logo and at least six images, along with text added to the images-not through Photoshop. A header (and title) must be included, and links to at least **FOUR** other pages
- Color choice, typography, and simplicity/appropriateness of images will be considered in grading. The HTML should validate with an external CSS file. The site must be responsive

-END OF COURSEWORK TASK BRIEF-

ANNEX A ASSESSMENT MARKING SCHEME
